

CAB MULTI CARRIER HOOKS

These hangers provide a safe system for the organization of computer, sensor, communication, control and electric wiring. They are especially useful along conveyor beltlines and when running multiple cables.

CAB 809

CAB 809 has three open style loops and a drive-in point for easy nailing into wood structure. Bottom carrier 1-1/4" diameter, other carriers 3/4" diameter, 8" long.

CAB 809 100/Box, 15 lbs.

CAB 910

CAB 910 features two 1" diameter closed loop carriers. Ideal for above beltlines because of short 5-1/4" length. Made from .156 wire with 1/2" diameter top loop.

CAB 910 50/Box, 9 lbs.

CAB 811

CAB 812

CAB 811 AND 812 features three 1-1/4" diameter closed loop carriers. CAB 812 has a 1/2" diameter top loop for installation from plates, spads or chain. The 811 has a sharp tip drive-in point for easy nailing into wood structure. Made from .156 wire, 10-5/8" long.

CAB 811 25/Box, 10 lbs.

CAB 812 25/Box, 10 lbs.

CAB 305

CAB 305 has four 1" diameter closed spiral loops. The 1/2" diameter top loop has a closed spiral design which prevents dislodging of hanger from beltline chain or other support after installation. Made from .156 wire, 11-3/4" long.

CAB 305 25/Box, 11 lbs.

CAB 231* 25/Box, 11 lbs.

*Same as CAB 305 except made with drive-in point for nail in application.

CAB 813 Same design as 910 but features four 1-1/4" diameter closed loop spirals which securely retain cables in hanger. Overall length 11".

CAB 813 40/Box, 19 lbs.

CAB TELEWIRE BARS

Heavy duty multi carrier hangers for roof installations. Top section made from 7 gauge x 1" steel and 5/16" round stock. Bottom carriers made any diameter in closed loop (pictured) or open loop designs. Can be made with 1 to 10 carriers. Custom made to your specifications.

CAB 199
CAB 205

CAB BLASTING WIRE HOOKS

are designed to safely isolate blasting or other wiring from the roof, electrical cables or structure. A 7/8" diameter 540° bottom loop securely retains wires in carrier. The 1/2" top spiral loop design prevents dislodging of hanger after installation.

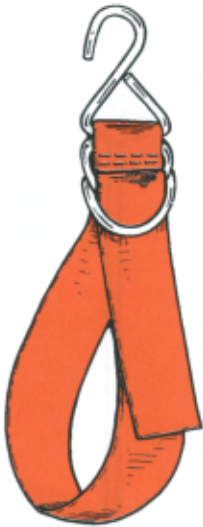

CAB 205 12" long, 50/Box, 7 lbs.

CAB 199 18" long, 100/Box, 18 lbs.

CAB WEBBING HANGERS

Heavy duty hangers designed to support pipes and cables from the roof of the mine. CAB hangers outperform others because the grommet holes which can cause pull-out failures have been eliminated. Improved design features sturdy offset hook sewn into non-absorbent, rot resistant polypropylene webbing. Weight carrying capacity of hanger is higher since weight load is distributed evenly across the entire width of webbing hooks. Waste is also reduced because there are no loose "S" hooks to fall off and get lost. For extra heavy duty applications specify hangers with welded hooks. Available in two standard sizes. Other lengths and widths of webbing available.

CAB DOUBLE "D" RING WEBBING HANGERS

Strong versatile hangers made for supporting water lines, hoses, pipes and air duct from the roof of the mine. Also very useful for controlling cables and hoses along longwall operations. Double "D" rings allow for quick and easy adjustment of hanger length. Lines can be raised up to the roof of the mine or kept level by simply adjusting the strap through the "D" rings. Provides 1-1/2" wide surface carrying area for the safe support of weight loads. Made from non-absorbent, rot resistant, orange polypropylene webbing with hot dipped galvanized hardware. Available in lengths of 2 feet to 10 feet in 1 foot increments. Lengths represent overall length of webbing and hook before assembly. For heavier loads, specify heavy duty 1/4" welded top hooks.

CAB PLASTIC TELEWIRE HOOKS

These Telewire Hooks are fabricated from .085 x 1 inch extruded PVC channel and are designed to hang from messenger wire or beltline structure. 5/8" wide wire support area and 15/16" nail hole. Made with 1/4" nylon nuts and bolts. Available with any number of carriers.

CAB 903

200/Box, 8 lbs.

CAB 904

With 90° offset, 200/Box, 8 lbs.

CAB 905

2 Carrier, 50/Box, 7 lbs.

CAB 906

3 Carrier, 50/Box, 9 lbs.

CAB 909

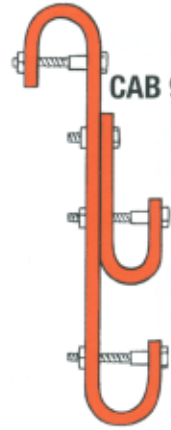

4 Carrier, 50/Box, 12 lbs.

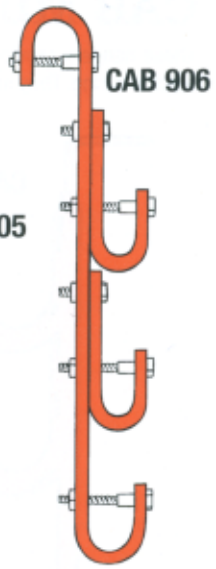

CAB 903

CAB 904

CAB 905

CAB 906

CAB 873
CAB 874

CAB BULLDOG PIPE SADDLES

Designed to quickly snap on pipe and securely retain a pressurized safety hose or cable in position on the pipe. Manufactured from high carbon .187 spring steel and totally plastisol coated for corrosion resistance and slippage reduction. Especially useful in methane drainage applications. Two standard sizes, other sizes available.

CAB 873

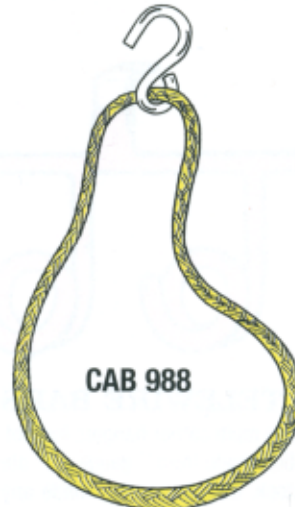

4" diameter, 100/Box, 15 lbs.

CAB 874

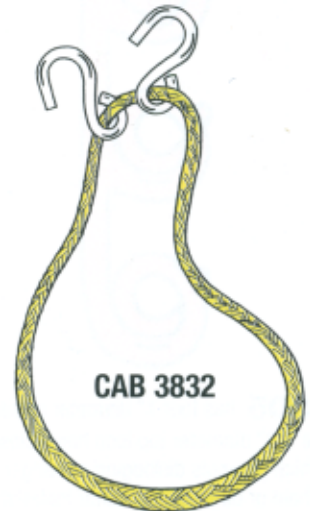

6" diameter, 50/Box, 12 lbs.

CAB ROPE HANGERS

This is a versatile line of hangers designed to support hose, pipe and cables in a variety of applications. Manufactured from 1/4" flame retardant hollow braid polypropylene rope with heavy duty galvanized hooks. Rope hangers are primarily intended for temporary cable support. For permanent cable support insulated steel hangers are recommended. Available in a wide variety of models, in any length and with any number of hooks. Also available with heavy duty 1/4" hooks. Standard styles listed below, many other styles available.
